SUPPORTING EXCELLENCE

CAD MANAGEMENT

Overview

For the smooth running of the design department you need to ensure that all engineers are working in a consistent manner. How do you ensure this is happening?

In this session we show your CAD/Drawing Office management team best practices to ensure all engineers are working with the correct tools and options within the software to ensure continuity across all users.

CAD Managers have a diverse range of responsibilities and this session looks to cover an equally wide range of content and topics.

What we will cover:

- What is a CAD manager

- CAD vendor interaction

- Workstation optimisation

- Software deployment strategy

- Standardization and CAD guidelines advice

- The value of your data. Are you controlling documents correctly?

- Continued professional development recommendations

- Emerging technologies

- Time for questions about management tools within the software answered (for example Bills of Materials or revision control)
