## Your engineer will:

- Check that the SW Electrical software is installed correctly
- Give an orientation for administrators
- Setup access to the SW Electrical Content Portal
- Setup an Electrical template to include:
  - » A bespoke sheet border for schematics sheets
  - » Edited wire styles with numbering formulas
  - » Refined PLC drawing configuration
  - » User reports inc. Parts list and Wiring from-to Relevant locations
- Create a selection of customer supplied symbols
- Create a selection of customer supplied parts
- Walk-through the macro procedure
- Setup user preferences
- Run through the design of a supplied schematic
- Help with any design queries
