

STRATEGIC VALUE ASSESSMENT

Overview

The Strategic Value Assessment (SVA) is a two stage evaluation of your business processes. The assessment enables us to understand your Critical Business Issues (CBI) so our consultants can make recommendations to maximise your success in your business sector.

We work with Executive Management to run discovery sessions with key employees to unearth bottlenecks and poor procedures that delay time to market, cause unnecessary costs and reduced margins. The findings and recommendations are presented back to Executive Management, where road-maps and next actions are discussed in detail.

This process has been known to identify over £250k worth of inefficiency (per annum) within some medium sized customers. What are the problems you live with really costing you? Are you even aware of the problem?

What we will cover:

- Optimise design time to give you more time to innovate
- Can any manual process be automated?
- Are tasks being duplicated?
- Are all departments pulling towards CBI in the same direction?
- Maximise your profitability
- Ensure a return on your software investment
