

# HEALTH CHECK

## Overview

Your company has invested in SOLIDWORKS software and training, but is your hardware up to the job in hand and are you using the best work flow?

This session reports on the hardware you are using to run SOLIDWORKS, offering advice to optimize its set up and makes recommendations where it falls short. We also look at your design workflow, offering quick fix advice to improve efficiencies to reduce time to market.

If your team report SOLIDWORKS 'crashing' or 'performance' issues related to speed or graphics this service helps to prove that your hardware either is or is not at fault.

## What we will cover:

- Graphics card optimization
- Review of hardware spec
- Basic workflow advice
- Review SOLIDWORKS options for performance
- Assess suitability of systems for specific tasks like Simulation or Rendering
